

TOMAGWA REACH

INFORMATION & ENGAGEMENT GUIDE

Health care in motion. Hope within *Reach*.

A department of TOMAGWA Health care Ministries bringing full-service community health care and services closer to home.

Why Reach?

Since 1989, TOMAGWA has provided compassionate, faith-rooted health care to neighbors in need. TOMAGWA Reach carries that mission beyond clinic walls by bringing our providers and a coordinated team of health care professionals, care-navigation specialists, volunteers, and trusted partners directly into the places people live, work, learn, worship, and gather.

Together, they provide trusted, comprehensive care and help patients move beyond a single visit through health education, medication support, referrals, eligibility assistance, and connections to continued care. By meeting people closer to home, Reach helps overcome barriers created by transportation, cost, mobility, limited access, and demanding schedules - the TOMAGWA Way.

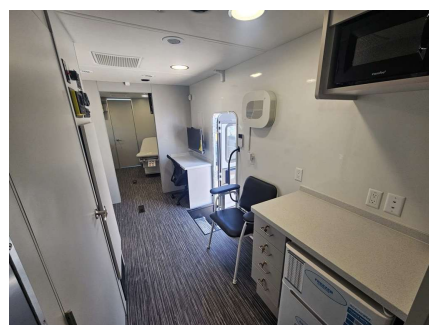

A solid mission, built to move.

TOMAGWA Reach is a brand-new, custom-built, 36-foot 2026 Winnebago Specialty Vehicle J38S, constructed on a 2024 Ford F-53 chassis. Designed as a safe, comfortable, and fully equipped clinical environment, Reach supports HIPAA and OSHA compliant operations and can be deployed for recurring community clinics, school vaccination events, focused health initiatives, and disaster response.

The Reach mobile health center is powered by TOMAGWA providers, health care professionals, care-navigation specialists, and volunteers who deliver care, connect patients to vital resources, and create local pathways to continued, sustainable care.

A HEALTH CENTER ON WHEELS

- Two full-size exam rooms
- Medication storage + refrigeration
- Patient restroom
- Secure digital connectivity
- Laboratory station
- Oversized wheelchair lift
- Independent power
- Navigation workspace

A people-powered, sustainable solution.

Reach brings more than a mobile health center into a community. It brings people committed to caring for that community. TOMAGWA providers and health care professionals deliver primary, preventive, maternal, and chronic disease care, while care-navigation specialists, outreach team members, and trained volunteers support health education, screenings, eligibility assistance, referrals, medication access, and follow-up.

Working alongside host sites, donors, and community partners, this coordinated team creates a familiar pathway from the first mobile visit to continued care through TOMAGWA and trusted medical and social-service partners. The result is care that is closer, more connected, and built to last.

Reach is not only a connector of care. It is a connector of community.		
	Access	Care where people live and gather.
	Prevention	Earlier intervention before crisis.
	Proximity	Fewer distance and transportation barriers.
	Trust	Care through familiar community settings.
	Continuity	Follow-up beyond the mobile visit.
	Dignity	Welcoming and respectful care.
	Connection	Navigation into services and support.
	Community	Local solutions built with partners.

Impact in motion.

Reach is designed around the people most likely to delay or go without care - and powered by the people committed to serving them. At each deployment, TOMAGWA's team works alongside trusted partners to deliver onboard medical care and wraparound services that are local to their unique communities.

Because Reach can return to a community regularly, respond to a focused health need, or join an established community event, it creates more than access for a day. Reach builds trust, continuity, and a dependable pathway to ongoing care.

CARE. CONNECT. COMMUNITY.

Who we serve.	WOMEN + GROWING FAMILIES Maternal, preventive, and ongoing women's health care closer to home.	OLDER ADULTS preventive and chronic disease care for seniors with mobility or transportation barriers.
	FAMILIES + WORKING ADULTS Convenient access for people balancing work, cost, caregiving, and limited nearby services.	COMMUNITIES WITH LIMITED ACCESS A trusted entry point neighbors and communities with provider shortages.
Where we deploy.	SCHEDULED COMMUNITY CLINICS Recurring primary care clinic days designed to create access and continuity.	PARTNER-HOSTED DEPLOYMENTS Care delivered at a trusted church, school, housing, nonprofit, or employer site.
	COMMUNITY HEALTH EVENTS Screenings, education, enrollment, and connections to follow-up care.	FOCUSED HEALTH INITIATIVES Maternal health, senior care, chronic disease, immunizations, or another priority.

Join us and let's Reach further, together.

IMPACT STORY

One person. One community.

A wider Reach.

"In 2025, we referred nearly 1,000 patients to TOMAGWA in need of maternal health. Due to transportation barriers, only a third were able to receive services. With Reach, TOMAGWA will be able to deploy directly to our community, at multiple sites where our clients typically go for support services, near their homes. This is going to be a game changer for our community." – Referral Partner

GIVE. SERVE. HOST. SPONSOR. COLLABORATE. CONNECT.

There is more than one way to extend Reach. Your time, talent, resources, or relationships can help bring care closer to someone who needs it.

GIVE

Make a one-time or recurring contribution to help bring care closer to home.

VOLUNTEER

Share clinical expertise, professional skills, outreach assistance, or hands-on service.

HOST TOMAGWA Reach

Help identify an accessible, trusted location where Reach can serve your community.

SPONSOR

Fund a deployment, health initiative, equipment need, or patient-care resource.

COLLABORATE

Contribute referrals, clinical services, navigation, education, or wraparound support.

CONNECT + ADVOCATE

Open doors to communities, leaders, funders, volunteers, or organizations that can extend Reach.

Find your place in the mission.
